ABOUT ME

Product-minded Computer Science Engineer with hands-on experience designing and deploying AI-driven automation workflows for enterprise clients - from requirements gathering and roadmap execution through cross-functional delivery and post-launch iteration. Skilled at translating ambiguous business problems into clear BRDs and testable specs, integrating workflows into client systems, and using structured experimentation and client feedback to continuously improve product-market fit.

WORK EXPERIENCE

Fundamento

Sep 2025 – Present

Customer Success Analyst

New Delhi

- Owned the roadmap for AI-driven automation workflows deployed across 5+ enterprise clients in BFSI and consumer sectors, translating business requirements into BRDs and specs that guided engineering execution end-to-end.
- Designed and integrated multi-channel workflows (Voice, WhatsApp) into client systems, making decisions on conversation structure, escalation logic, and channel sequencing based on user behaviour and business needs.
- Collaborated with cross-functional product and engineering teams through scoping, testing, go-live, and post-launch iteration across live enterprise deployments.
- Worked directly with client stakeholders post-launch to gather adoption feedback and iterate on workflow configuration, ensuring deployed systems continued to meet evolving business requirements.
- Diagnosed underperforming workflows through gap and root cause analysis, then tested fixes across timing, flow, and segmentation - lifting connectivity on unique leads from 60% to 70%+.
- Tracked KPIs across all active deployments and synthesized performance data into recommendations that shaped client and internal product strategy.

FactWise

Aug 2024 – Nov 2024

Technical Product Manager Intern

Mumbai

- Authored PRDs, user stories, and functional specs across multiple product modules, translating stakeholder needs into clear, testable requirements for engineering.
- Ran product testing and UAT at each build stage, identifying usability gaps and prioritizing fixes with the dev team through resolution.
- Coordinated cross-functional input from developers, QA, and business stakeholders to keep parallel feature streams aligned and on schedule.
- Iterated on wireframes and prototypes in Figma based on direct user research, improving module clarity and usability ahead of release.

Sharajman Technologies

May 2023 – Jun 2023

UI Developer Intern

New Delhi

- Built responsive web interfaces and ran user research/usability testing with real users, iterating on design to improve engagement and accessibility.

EDUCATION

SRM Institute of Science and Technology

B.Tech, Computer Science Engineering (Big Data Analytics)

June 2025

Tamil Nadu

Mount Carmel School

SSC and HSC

March 2021

New Delhi

PROJECTS

FlipClock Screensaver & PWA

<https://aiswaryaarajesh.github.io/FlipClock/>

Independently designed, built, and published a cross-platform Progressive Web App - live on Android, iOS, and as a Windows screensaver - with custom flip animations, light/dark mode theming, and a wake-lock feature, taking it from concept to public release solo.

Portfolio Website

<https://aiswaryaarajesh.github.io/Portfolio/>

Designed and built a responsive personal site from scratch, combining interactive animations with Figma-prototyped components, optimizing every screen size for clarity and ease of use.

Lok Sabha '24 Election Data Analysis

<https://github.com/AiswaryaaRajesh/Lok-Sabha-24-Data-Analysis>

Built interactive Power BI dashboards to cut through a large, messy election dataset, surfacing vote-share trends, coalition dynamics, and state-level patterns in a format that was actually readable and useful - not just technically accurate.

VOLUNTEERING EXPERIENCE

Aaruush – International Techno-Management Fest, SRM

2022 – 2025

Creatives Committee Organiser

Tamil Nadu

- Led a 30-person team across three years, managing timelines and cross-team stakeholder alignment to deliver one of India's largest student-run tech fests.
- Introduced clearer handoff and communication processes, reducing duplication and improving cross-committee coordination efficiency.

Magic Bus, NGO

Aug 2025 – Sep 2025

Volunteer

New Delhi

- Supported trainers and engaged students during classroom sessions on practical skill-building activities.
- Delivered a session on "AI in 2025," introducing students to practical AI tools for productivity.
- Ran mock interviews and delivered structured feedback to help students prepare for real-world opportunities.

SKILLS

Product: Product Roadmap, PRDs, User Stories, Backlog Management, Product Strategy, Go-to-Market Thinking, UAT, KPI/OKR Tracking, A/B Testing, Customer Discovery, Stakeholder Management

Analytics: Data Analysis, SQL (MySQL), Power BI, Excel, Data Visualization, Experimentation

AI & Automation: Conversational AI Design, Agentic Workflow Design, Prompt Engineering

Tools: Figma, Power BI, Postman, Notion, Git, GitHub, Microsoft Excel

Technical: Python, SQL, JavaScript, C/C++, API Testing

Languages: English, Hindi, Tamil
